PROFESSIONAL SUMMARY

Software Developer with 2+ years of enterprise experience at **Tech Mahindra**, working on **Meta Platforms** (Instagram, Facebook, WhatsApp) serving billions of users. Specializing in **Generative AI Engineering** — building production-grade applications using **Python, LangChain, RAG Systems, AI Agents**, and **LangGraph**. Recognized with **Pat On The Back** and **Bravo** awards at Tech Mahindra. Passionate about combining strong engineering fundamentals with cutting-edge GenAI to ship real AI products.

TECHNICAL SKILLS

GenAI & LLM:	LangChain · LangGraph · LlamaIndex · RAG Systems · AI Agents · Prompt Engineering · Vector Databases (ChromaDB, Pinecone)
LLM APIs:	OpenAI GPT-4o · Groq API (LLaMA 3) · Google Gemini · Anthropic Claude · AWS Bedrock · HuggingFace
Languages:	Python · Java · SQL
Backend & Deploy:	FastAPI · REST APIs · Streamlit · Railway · Docker (Basics)
Tools & DevOps:	Git · GitHub · Jenkins · Maven · JIRA · Postman · Agile / Scrum

PROFESSIONAL EXPERIENCE

Tech Mahindra — Software Developer & GenAI Engineer

Client: Meta Platforms (Instagram · Facebook · WhatsApp Messenger) | April 2024 – Present | Ahmedabad

- Worked on enterprise-scale software for **Meta Platforms** — Instagram, Facebook, and WhatsApp — serving **billions of users** across Android, iOS, desktop, and web platforms in a fast-paced weekly release cycle.
- Developed and integrated **Generative AI features** using Python, LangChain, and LLM APIs (OpenAI, Groq) into Meta platform workflows, enabling intelligent automation and AI-powered functionality.
- Built **RAG (Retrieval-Augmented Generation) pipelines** using LangChain and ChromaDB to enable context-aware document querying and intelligent information retrieval across platform data.
- Designed and deployed **AI Agents** using LangGraph and LangChain tool integrations capable of autonomous multi-step task planning and execution within Meta platform ecosystems.
- Implemented **Prompt Engineering strategies** — zero-shot, few-shot, and chain-of-thought prompting — to optimize LLM outputs for platform-specific GenAI use cases.
- Developed and maintained **Java-based application frameworks** for large-scale platform workflows, ensuring stability and reliability across multiple concurrent feature releases.
- Built **REST API integrations** and automated data-driven workflows using Python and Java with JSON processing, contributing to platform efficiency improvements.
- Collaborated with **global onsite Meta engineering teams**, providing daily technical reporting and participating in cross-functional Agile sprint planning and reviews.
- Utilized **Git, Maven, Jenkins CI/CD pipelines** for version control, build automation, and continuous delivery across multiple feature branches simultaneously.
- Contributed to platform quality improvements resulting in a **30% increase in release quality** and **45% reduction in repetitive manual workflows** through intelligent automation.
- Received **Pat On The Back** award for proactive identification of high-severity platform issues and **Bravo** award for outstanding contribution to team delivery.

KEY PROJECTS

1. RAG Document Intelligence Chatbot

Python · LangChain · ChromaDB · Groq API · Streamlit · FastAPI · Railway

- Built end-to-end **RAG pipeline** from scratch — document loading, chunking, embedding generation, and semantic similarity search using LangChain and ChromaDB.

- Created conversational interface with **Streamlit**, persistent chat history memory, and real-time streaming responses via FastAPI backend.
- Deployed live on **Railway** with REST endpoints, JWT authentication, and session management for production-ready usage.
- GitHub: github.com/nallasatish/rag-chatbot | Live: your-app.railway.app

2. Intelligent AI Automation Agent

Python · LangChain · LangGraph · Groq API · FastAPI · Tools Integration

- Architected a **multi-tool AI Agent** using LangChain and LangGraph capable of autonomous task planning, reasoning, and real-world action execution.
- Integrated web search, file operations, and data processing tools enabling complex multi-step workflow automation with transparent **ReAct reasoning loop**.
- Deployed as production **FastAPI REST service** with streaming responses, rate limiting, and Postman-documented API collection.
- GitHub: github.com/nallasatish/ai-agent | Live: your-app.railway.app

EDUCATION

Bachelor of Technology (B.Tech) — Electronics & Communication Engineering

Pondicherry Engineering College | Graduated 2023 | CGPA: 7.88

AWARDS

- **Pat On The Back** — Tech Mahindra: Proactive identification of high-severity platform issues
- **Bravo** — Tech Mahindra: Outstanding contribution to team delivery and platform quality
